Subject: Data Priorities

1. Support OPS and keep Janine in the loop.
2. Update the viewer with the new graphs from last night. Go ahead and take the others down even before you start developing.
3. Keep processing and validating the data.
4. Where do we stand on those stream segments? Let's make them all yellow for now.
5. Give me an assessment of development costs to fully deploy SADIE in the R6 environment.

Dan Burgo, R1 DATA Team member will be on the ground later today. he will spend about 1/2 time imbedded at Area Command to shepherd the data thing across all 3 regions (the rest of his time he will be EUL in the R8 IMT).
